FIG. 27

FIG. 28 is a perspective view of the device 200 in a closed position. The device 200 includes a main body 202, a lid 210, and a handle 212. The lid 210 is hinged to the main body 202 and is shown in a closed position. The handle 212 is attached to the lid 210 and is used to open the lid. The device 200 also includes a plurality of ports 218 and a filter 204. The ports 218 are located on the front of the main body 202 and are used for connecting the device to other components. The filter 204 is located at the bottom of the main body 202 and is used to filter the liquid passing through the device.
